

Maven Installation Guide (Windows)

1. Download Apache Maven

Open:

<https://maven.apache.org/download.cgi>

Download: apache-maven-3.9.x-bin.zip

2. Extract Maven

Extract to: C:\apache-maven-3.9.x

Folder structure includes: bin, boot, conf, lib, LICENSE, NOTICE

3. Set Environment Variables

Open: System Properties → Advanced → Environment Variables

Add M2_HOME:

Variable name: M2_HOME

Value: C:\apache-maven-
3.9.x

Add MAVEN_HOME:

Variable name: MAVEN_HOME

Value: C:\apache-maven-3.9.x

4. Add Maven to

PATH Add to PATH:

C:\apache-maven-3.9.x\bin

5. Verify

Installation Run in

CMD:

mvn -version

Expected output:

Apache Maven 3.9.x

Java version: 17.x

Troubleshooting:

If mvn not recognized:

- PATH incorrect
- Restart terminal
- Ensure mvn.cmd is present in bin folder
