

Simple Jenkins Pipeline Practical

Objective

To create and run a simple Jenkins pipeline without using Git or Docker.

Prerequisites

1. Jenkins installed and running 2. Basic understanding of pipeline concept

Step 1: Open Jenkins Dashboard

Open your browser and go to <http://localhost:8080> and login to Jenkins.

Step 2: Create a New Pipeline Job

1. Click on 'New Item' 2. Enter job name: simple-pipeline 3. Select 'Pipeline' 4. Click OK

Step 3: Configure Pipeline Script

Scroll to Pipeline section and select 'Pipeline script', then add the following code:

```
pipeline {
  agent any

  stages {
    stage('Build') {
      steps {
        echo 'Building the project...'
      }
    }

    stage('Test') {
      steps {
        echo 'Running tests...'
      }
    }

    stage('Deploy') {
      steps {
        echo 'Deploying the application...'
      }
    }
  }
}
```

Step 4: Save and Run Pipeline

Click on 'Save' and then click on 'Build Now' to run the pipeline.

Step 5: Observe Output

Click on the build number and open 'Console Output' to see execution logs.

Expected Output

All stages (Build, Test, Deploy) should execute successfully with messages displayed.

Conclusion

Successfully created and executed a simple Jenkins pipeline.
